

Proposal for BOF, Grace Hopper conference

ACM - meet the leaders and have your say

Founded in 1947, ACM is a major force in advancing the skills of information technology professionals and students worldwide. Today, our 75,000 members and the public turn to ACM for the industry's leading Portal to Computing Literature, authoritative publications and pioneering conferences, providing leadership for the 21st century.

ACM works for women in computing through its student chapters, regional meetings, authoritative data and the Grace Hopper Conference.

It partners with CRA-W, Anita Borg Institute, the National Center for Women in Technology and more. ACM-W is ACM's committee on women, and provides an umbrella within ACM to initiate and continue a variety of ongoing and one-off activities

This BOF is your chance to hear more from the senior leadership of ACM and ACM-W, and tell us what works, what doesn't and what you'd like to see ACM doing for women.
